DETAILED ACTION

Claims 1-61 are pending.

Notes

It is noted by the examiner that claim 12 recites the limitation “the client ticket” on page 19. There is insufficient antecedent basis for this limitation in the claim.

It is noted by the examiner that claim 64 is a duplicate of claim 57.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-35 and 38-61, drawn to a method of authenticating a client through a server to a target service, classified in class **709**, subclass **225**.
- II. Claims 36 and 37, drawn to a data structure used to store credentials for different computers, classified in class **707**, subclass **100**.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as storing credentials for clients. See MPEP § 806.05(d).

These inventions are distinct for the reasons given above, and the search required for each Group is different and not co-extensive for examination purpose. For example, the searches for

the two inventions would not be co-extensive because these groups would require different searches on PTO's classification class and subclass as following:

- (a) The Group I search (claims 1-35 and 38-61) would require use of search Class **709**, subclass **225** (not require for the invention II).
- (b) The Group II search (claims 36 and 37) would require use of search Class **710**, subclasses **100** (not require for the invention I).
